

Dark Ember

Tim Brooks

After the pic - nic we licked out the fire,
cov - ered the ash es with brush - en and briar, when we
looked from the road, nothing had showed, no trace where the
fi - re had been. But there's a dark em - ber her deep in the
ground and no - one but you can say where it found but with
care and with kindling and a warm breath of wind the
fire could start burning a - gain.
